YOU GOTTA LOVE THOSE NEW AGE HOUSES WITH THE ANCIENT TWIST. NOT TO MENTION THE LANTERNS...

It's time to decide. America or 日本?

When was the last time you studied in a country other than your own? Never? Your serious? Well... I guess we'll just have to change that. If you love Japan and want to study abroad, going to Japan for High School will do you wonders. Not to mention the benefits.

As this is the first newsletter, it doesn't have that much on it. But from now on, it will contain all you need to know to make it to Japan, and live there successfully.

There are many cool aspects of going to Japan for High School and beyond.

One of them is actually you. That's right, when you go to Japan, the Japanese will love you. For some strange reason most Japanese people love the west (america included...)

5 BENEFITS OF JAPANESE H.S.

1. YOU'RE COOL JUST BY BEING AMERICAN.
2. YOU GET TO BENEFIT FROM THE TASTY AND HEALTHY FOOD.
3. YOU GET TO SPEAK JAPANESE!
4. YOU CAN DO PARKOUR IN TOKYO.
5. YOU GET THE CHANCE TO EVACUATE AMERICA.

This newsletter is nearly done, but there is more to come!

Strangely enough, the country that you were born in (unless your parents move to different countries) is the country you will live, work, and die in. I want to be the one that changes that sad fact. Do you like another country more than your own? You should be allowed to become a resident of that country and not have to suffer by living in your country of origin.

There are many good things about america. There are also many problems with Japan. Regardless, I (and probably

you too) like Japan better. Well you are a smart person, and because of it you can live in the right country (for you).

In the next newsletter there will be:

- 1) A list of phrases that you should definitely know.
- 2) A list of Japanese names (both first and last) that you can use to choose a name you will use in Japan.
- 3) More random pictures, and;
- 4) Much, much more...
